| Portfolio: krunika-patel.vercel.app

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building scalable SaaS platforms and web applications using React.js, Next.js, Node.js, MongoDB, and Prisma ORM. Skilled in API design, security, and performance optimization. Experienced in leveraging AI tools including Claude, ChatGPT, and GitHub Copilot to accelerate development, improve code quality, and streamline the full development lifecycle.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Redux, React Query, Zustand, Tailwind CSS, MUI

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, RBAC

Database: MongoDB, Prisma ORM, MySQL

AI & Dev Tools: Claude AI, ChatGPT, GitHub Copilot, Cursor

Core Concepts: SaaS Architecture, Performance Optimization, Security, Real-Time Features, Agile/Scrum

PROFESSIONAL EXPERIENCE

Full Stack Developer | Space-O Technologies | Aug 2024 – Mar 2026

Built and enhanced FieldCamp, a B2B field service management SaaS platform using Next.js, Node.js, MongoDB, and Prisma ORM.

- Developed core modules including client onboarding, job scheduling, inventory management, and a client-facing self-service portal.
- Optimized RESTful APIs with indexing, query batching, and pagination — significantly reducing average response time.
- Implemented security best practices: JWT authentication, RBAC, input validation, data sanitization, and rate limiting.
- Built real-time chat and push notifications using WebSockets for live coordination between clients and technicians.
- Leveraged AI tools (Claude, ChatGPT, Copilot, Cursor) across the full SDLC — boosting development velocity and code quality.

Software Developer | Elaunch Solution | Mar 2022 – Mar 2024

Worked on Abhiman (job marketplace) and Oppi-Wallet (crypto web app) — building React.js frontends, admin dashboards, and backend APIs.

- Built React.js admin dashboard for Abhiman managing job records — including lifecycle tracking, dynamic forms, and real-time field validation to reduce input errors.
- Designed RESTful APIs for job management, user profiles, and search/filtering supporting 1,000+ registered users.
- Developed Oppi-Wallet frontend and admin dashboard with wallet overview, transaction history, secure JWT authentication, and portfolio management.
- Integrated real-time chat via WebSockets and improved performance through memoization and API caching.

Software Developer Intern | Elaunch Solution | Jul 2021 – Feb 2022

Built Laravel (PHP) backend APIs and React.js frontend integrations for Bus Booking and Lottery Management systems.

- Developed RESTful APIs in Laravel for route management, seat availability, booking lifecycle, and ticket generation.
- Built Lottery Management backend covering draw scheduling, ticket generating, and winner selection logic.
- Assisted in React.js frontend development, API integration, and MySQL database design and query optimization.

EDUCATION

Bachelor of Engineering — Information Technology | CGPA: 8.34 / 10.0

KEY STRENGTHS

- AI-Augmented (Vibe Coder): Uses Claude, ChatGPT, Copilot, and Cursor across the entire SDLC — from feature implementation to unit test generation.
- Strong problem-solving and debugging skills
- Expertise in complex state management and UI logic
- Adaptable and quick learner in fast-paced environments
